

ULTRAFLOTM COMPOUNDED WATER-SOLUBLE FLORFENICOL

Designed specifically for livestock and poultry, UltraFlor provides a 4.25% florfenicol oral solution. As a synthetic broad-spectrum antibiotic, florfenicol is used for the treatment of respiratory disease associated with *Actinobacillus pleuropneumoniae*, *Pasteurella multocida*, *Salmonella choleraesuis* and *Streptococcus suis*.* The unique formulation of UltraFlor allows veterinarians to have flexible dosing that has not been achievable with other oral florfenicol products.

product details.

MIXING GUIDELINES

- Mix up fresh UltraFlor every 24 hours
- Warm water improves UltraFlor stability and solubility
- Thoroughly mix and let bubbles dissipate
- Poor water quality may make it more difficult to mix UltraFlor
- Stir pumps can be used with UltraFlor
- Bring UltraFlor to room temperature if shipped at a cold temperature
